As mentioned in Note 48.1 of Financial Statements, Full Disclosure on the Capital Adequacy, leverage Ratio & liquidity Requirements as per SBP Instructions has been placed below

CAPITAL ASSESSMENT AND ADEQUACY

Scope of Applications 1.1

Amounts subject to Pre - Basel III treatment

The Basel-III Framework is applicable to the bank both at the Standalone and consolidated level (comprising of wholly/partially owned subsidiaries & associates). While calculating Consolid Capital Adequacy for the Group, Subsidiaries are included using full consolidation method whereas associates in which the Bank has significant influence, are included on equity method. Standardized Approach is used for calculating the Capital Adequacy for Credit and Market risks, whereas, higher of Alternate Standardized Approach (ASA) or 70% of Basic Indicator Approach (BIA) is used for Operational Risk Capital Adequacy purpose.

1.2 Capital Management

1.2.1 Objectives and goals of managing capital

The Group manages its capital to attain following objectives and goals

- an appropriately capitalized status, as defined by Banking regulations;
 acquire strong credit ratings that enable an optimized funding mix and liquidity sources at lesser costs;
- cover major risks underlying business activities; and
- retain flexibility to harness future investment opportunities, build and expand even in stressed times

1.2.2 Statutory Minimum Capital Requirement and Capital Adequacy Ratio

The State Bank of Pakistan through its BSD Circular No.07 of 2009 dated April 15, 2009 requires the minimum paid up capital (net of losses) of all locally incorporated Banks to be raised to PKR 10 billion. The paid up capital of the Bank for the year ended December 31, 2024 stands at PKR 15.771 billion and is in compliance with the SBP requirement for the said year

The capital adequacy ratio of the Group is subject to the Basel III capital adequacy guidelines stipulated by the State Bank of Pakistan through its BPRD Circular No. 06 of 2013 dated August 15, 2013. These instructions are effective from December 31, 2013 in a phased manner with full implementation by December 31, 2019. Under Basel III quidelines Banks are required to maintain the following ratios on an ongoing basis

Existing Minimum Capital Requirements:

Sr. No	Ratio	2024
1	CET 1	6.0%
2	ADT 1	1.5%
3	Tier 1	7.5%
4	Total Capital	10.0%
5	*CCB	1.50%
6	Total Capital Plus CCB	11.50%

*Starting March 2020. Capital Conversation Buffer (CCB) as prescribed vide BPRD Circular No. 6 of August 15, 2013 has been reduced from its existing level of 2,50% to 1,50%, till further instructions; thereby resulting in CAR requirement of 11.50%

Group's regulatory capital is analysed into three tiers

Common Equity Tier 1 capital (CET1), which includes fully paid up capital (including the bonus shares), balance in share premium account, general reserves, statutory reserves as per the financial statements and net unappropriated profits after all regulatory adjustments applicable on CET1

Additional Tier 1 Capital (AT1), which includes perpetual non-cumulative preference shares / TFCs and share premium resulting from the issuance of preference shares, after all regulatory

Tier 2 capital, which includes Subordinated debt/ Instruments, share premium on issuance of Subordinated debt/ Instruments, general provisions for loan losses (up to a maximum of 1.25% of credit risk weighted assets), net reserves on revaluation of fixed assets, equity investments and foreign exchange translation reserves after all regulatory adjustments applicable on Tier-2.

The required capital adequacy ratio was achieved by the Group through improvement in the capital base, adequate risk profile of asset mix, ensuring better recovery management and maintaining acceptance profit margins. Banking operations are categorized as either trading book or banking book and risk-weighted assets are determined according to specified requirements of the State Bank of Pakistan that seek to reflect the varying levels of risk attached to assets and off-balance sheet exposures. The total risk-weighted exposures comprise of the credit risk, market risk and

Basel-III Framework enables a more risk-sensitive regulatory capital calculation to promote long term viability of the Group. As the Group carry on the business in multiple jurisdiction and segments, it is critical that it is able to continuously monitor the exposure across entire organization and aggregate the risks so as to take an integrated approach/view. Maximization of the return on risk-adjusted capital is the principal basis to be used in determining how capital is allocated within the Group to particular operations. The Group remained compliant with all externally imposed capital requirements through out the year. Further, there has been no material change in the Group's management of capital during the year.

SBP in BPRD circular letter no 02 of 2025 allowed banks to recoginize Foreign Exchange Translation reserves as part of Common Equity Tier-1 (CET-1) Capital with effect from December 31, 2024.

1.2.3 IFRS 9 - 'Financial Instruments'

As per SBP BPRD Circular Letter No. 07 of 2023 dated April 13, 2023. IFRS 9 is applicable on banks with effect from January 01, 2024. IFRS 9 brings fundamental changes to the accounting for financial assets and to certain aspects of accounting for financial liabilities. To determine appropriate classification and measurement category, IFRS 9 requires all financial assets, except equity instruments, to be assessed based on combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The adoption of IFRS 9 has also fundamentally changed the impairment method of financial assets with a forward-looking Expected Credit Losses (ECL) approach.

The SBP through its BPRD Circular Letter No. 16 dated July 29, 2024 has made certain amendments and extended the timelines of some of SBP's IFRS 9 Application Instructions to address the matters raised by the banks with a direction to ensure compliance by the extended timelines.

Treatments of some aspects of IFRS 9 are still under deliberation with the SBP. The Bank has adopted treatment discussed in meeting of Pakistan Bank Association and SBP for such matters which includes modification of loans from 2020 onwards, unlisted equity instruments where fair value not available to be accounted for at lower of cost or breakup value in respect of these matters in the prior periods till the time SBP issues the relevant guidance / clarification.

Impact of IFRS /9 on Regulatory Capital:

The introduction of IFRS 9 has resulted in reduction in regulatory capital of the Banks, which has reduced their lending capacity and ability to support their clients. In order to mitigate the impact of ECL models on capital, SBP has determined that it may be appropriate for the banks to introduce a transitional arrangement for the impact on regulatory capital from the application of ECL accounting. Annexure B of the 'Application Instructions' issued by SBP has detailed the transitional arrangement.

The transitional arrangement applies only to provisions for stage 1 and stage 2 financial assets. The transitional arrangement must adjust CET1 capital. Where there is a reduction in CET1 capital due to new provisions, net of tax effect, upon adoption of an ECL accounting model, the decline in CET1 capital (the "transitional adjustment amount") must be partially included (i.e., added back) to CET1 capital over the "transition period" of five years.

Moreover, SBP has allowed to adjust the amount of Stage 1 and Stage 2 provisions in Tier 2 Capital that have not been added back to CET 1 and vice versa as per Annexure-A of BPRD Circular no 16 of 2024.

1.2.3 Leverage Ratio

Leverage ratio is defined as ratio of Group's Eligible Tier 1 Capital to Total Exposure. The leverage ratio of the Group as at December 31, 2024 is 3.93 % (2023: 3.55%) calculated on average of three months exposure. The ratio has been computed as prescribed by State Bank of Pakistan through Instructions for Basel-III Implementation in Pakistan and subsequent FAQs issued in this regard.

As on December 31, 2024; Total Tier 1 capital of the Group amounts to PKR 160.3 billion (2023: PKR 125.8 billion) whereas the average total exposure measure amounts to PKR 4,077.78 (2023: PKR 3.541.56 billion).

1.2.4 Risk Appetite

Risk Appetite (RA) defines the maximum level of risk the Bank is willing to accept in pursuit of its strategic and business objectives, as set by the Board of Directors. In establishing RA—including tolerance levels and limits—the Bank ensures that resources, including capital, are effectively allocated, and risk exposures remain within the boundaries of the risk management framework. The Risk Appetite Statement (RAS) maintains a balance between the Bank's strategic ambitions, growth objectives, operational plans, capital adequacy, and material risks, in line with regulatory requirements.

The RAS is reviewed periodically, taking into account historical trends, regulatory expectations, stress test outcomes, and senior management's assessment of economic conditions in relation to business objectives. To enhance the adaptability of the RA framework, the Bank has defined various economic zones based on the country risk matrix, assigning distinct tolerance thresholds and limits to key risk parameters for each zone.

1.2.5 Stress Testing

Stress testing examines the sensitivity of Bank's Capital for Regulatory as well as Economic capital under a number of scenarios and ensures that emerging risks stemming into its portfolio are appropriately accounted. The scope of this exercise has been expanded to incorporate internally developed scenarios based on macroeconomic situation & portfolio composition as well.

1.2.6 Capital Adequacy

Group's approach for assessing the adequacy of the capital to support current and future business operations is based on the following:

- Capital Adequacy plays key consideration for not only arriving at the business projections / plans but it is well monitored while undertaking transactions.
- b. The bank continues to remain sufficiently capitalized institution with the capital base above regulatory limits. Bank's total Capital Adequacy Ratio stands at 17.76% against the requirement of 11.50% (including CCB of 1.50%); while supporting credit growth and steady dividend payout stream.
- c. The capital base forms the fundamental constituent-of Bank's business plans; which is at sufficient level to support the envisaged business growth and this would be monitored regularly.
- d. The Bank enjoys strong sponsor support from Abu Dhabi Group, leading to increased investor confidence

1.3 Capital Adequacy Ratio as at December 31, 2024

		not applicable	Upon occurrence of the PONV Trigger Event CET 1 Trigger Event or Lock-in Clause; if directed by the SBP, the TFCs shall be converted into ordinary shares or permanently written off. 1. Point of Non-Viability Trigger Event (PONV Trigger Event) shall be earlier of: a. A decision made by the SBP that a conversion or permanent write-off is necessary without which the Issuer would become nonviable; or b. The decision to make a public sector injection of capital, or equivalent support, without which the Issuer would have become nonviable, as determined by SBP. The SBP will have full discretion in declaring the PONV Trigger Event. 2. CET 1 Trigger Event: The pre-specified trigger for loss absorption through conversion shall be the Issuer's Shareholders Equity Tier 1 raio failing to or below 6.625% of Risk Weighted Assets ("CET 1 Trigger Event."). The Issuer shall immediately notify the SBP upon the occurrence of the CET 1 Trigger Event. 3. Lock-in Clause: any inability to exercise the lock-in clause or non-cumulative feature will subject these TFCs to mandatory conversion into ordinary shares/write off at the discretion of SBP. Based on the above contingent events, SBP may ask the Bank to convert the TFCs into ordinary shares	Upon occurrence of the PONV Trigger Event, CET 1 Trigger Event or Lock-in Clause, if directed by the SBP, the TFCs shall be converted into ordinary shares or permanently written off. 1. Point of Non-Viability Trigger Event (PONV Trigger Event) shall be earlier of: a. A decision made by the SBP that a conversion or permanent write-off is necessary willbout which the issuer would become nonviable, or b. The decision to make a public sector injection of capital, or equivalent support, without which the issuer would have become nonviable, as determined by SBP. The SBP will have full discretion in declaring the PONV Trigger Event. 2. CET 1 Trigger Event. The pre-specified trigger for loss absorption through conversion shall be the lissuer's Shareholders Equity Tier I ratio falling to or below 6.625% of Risk Weighted Assets (*CET 1 Trigger Event.) Trigger Event. 3. Lock-in Clause: any inability to exercise the lock-in clause or non-cumulative feature will subject these TFCs to mandatory conversion into ordinary shares/white off at the discretion of SBP may ask the Bank to convert the TFCs into ordinary shares
25	If convertible, fully or partially	not applicable	May convert fully or partially	May convert fully or partially
26	If convertible, conversion rate	not applicable	To be determined in the case of trigger event	To be determined in the case of trigger event
27	If convertible, mandatory or optional conversion	not applicable	To be determined as per Basel III guidelines	To be determined as per Basel III guidelines
28	If convertible, specify instrument type convertible into	not applicable	Common Equity Tier 1	Common Equity Tier 1
29	If convertible, specify issuer of instrument it converts into	not applicable	BAFL	BAFL
	Write-down feature	not applicable	Yes	Yes
31	If write-down write-down trigger(s)	not applicable	The Issuer shall, if directed by the SBP, write-off the Relevant Amount of the TFCs (i) upon the PONV Trigger Event; (ii) upon the CET 1 Trigger Event; (ii) upon the Lock-lie Event; or (v) if it is not possible to convert the TFCs into ordinary shares upon the CET 1 Trigger Event. A write off due to PONV Trigger Event shall occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted.	The Issuer shall, if directed by the SBP, write-off the Relevant Amount of the TFCs (i) upon the PONV Trigger Event; (ii) upon the CDF1 Trigger Event; (ii) Upon the Lock-in Event; or (iv) if it is not possible to convert the TFCs into ordinary shares upon the CET1 Trigger Event. A write off due to PONV Trigger Event shall occur prior to any public sector injection of capital so that the capital provided by the public sector is not diluted.
32	If write-down, full or partial	not applicable	Fully and Partially both	Fully and Partially both
	If write-down, ran or partial	not applicable	Permanent	Permanent
	If temporary write-down, description of write-up mechanism	not applicable	not applicable	not applicable
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument	not applicable	Depositors and general creditors	Depositors and general creditors
36	Non-compliant transitioned features	not applicable	No	No
37	If yes, specify non-compliant features	not applicable	not applicable	not applicable

43.7 Risk Weighted Assets

The capital requirements for the banking group as per the major risk categories should be indicated in the manner given below:-

	Capital Requirements		Risk Weighted Assets	
	2024	2023	2024	2023
Credit Risk		(Rupees	in '000)

a Unweighted values must be calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).

b Weighted values must be calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates (for inflows and outflows).

c Adjusted values must be calculated after the application of both (i) haircuts and inflow and outflow rates and (ii) any applicable caps (i.e. cap on level 2B and level 2 assets for HQLA and cap on Inflows).
